Connecting to mfavpn.tamut.edu

Step 1: Access the VPN Portal

Visit mfavpn.tamut.edu. You will be redirected to login.microsoftonline.com. Sign in with your employee email and password.

Step 2: Install Global Protect

Download the correct version of the Global Protect client for your computer and install it. For most Windows devices, you will click on the Windows 64-bit link.

You can also go to your Settings > System > About and look for the section that says, "System Type". This will tell you whether you have a 32-bit or 64-bit system.

Step 3: Configure the VPN

Enter the portal address: mfavpn.tamut.edu and click Connect. Log in using your employee email and password.

You are now connected to the VPN.

Changing the Portal Address

If you previously configured Global Protect to use vpn.tamut.edu, follow these steps to update it to mfavpn.tamut.edu:

1. Open the GlobalProtect app and click on the hamburger menu in the top right.

2. Open Settings.

3. Click on the current portal and edit.

4. Change the portal address to mfavpn.tamut.edu.

5. Close the GlobalProtect Settings and connect to the portal.
